

الفضل الأول

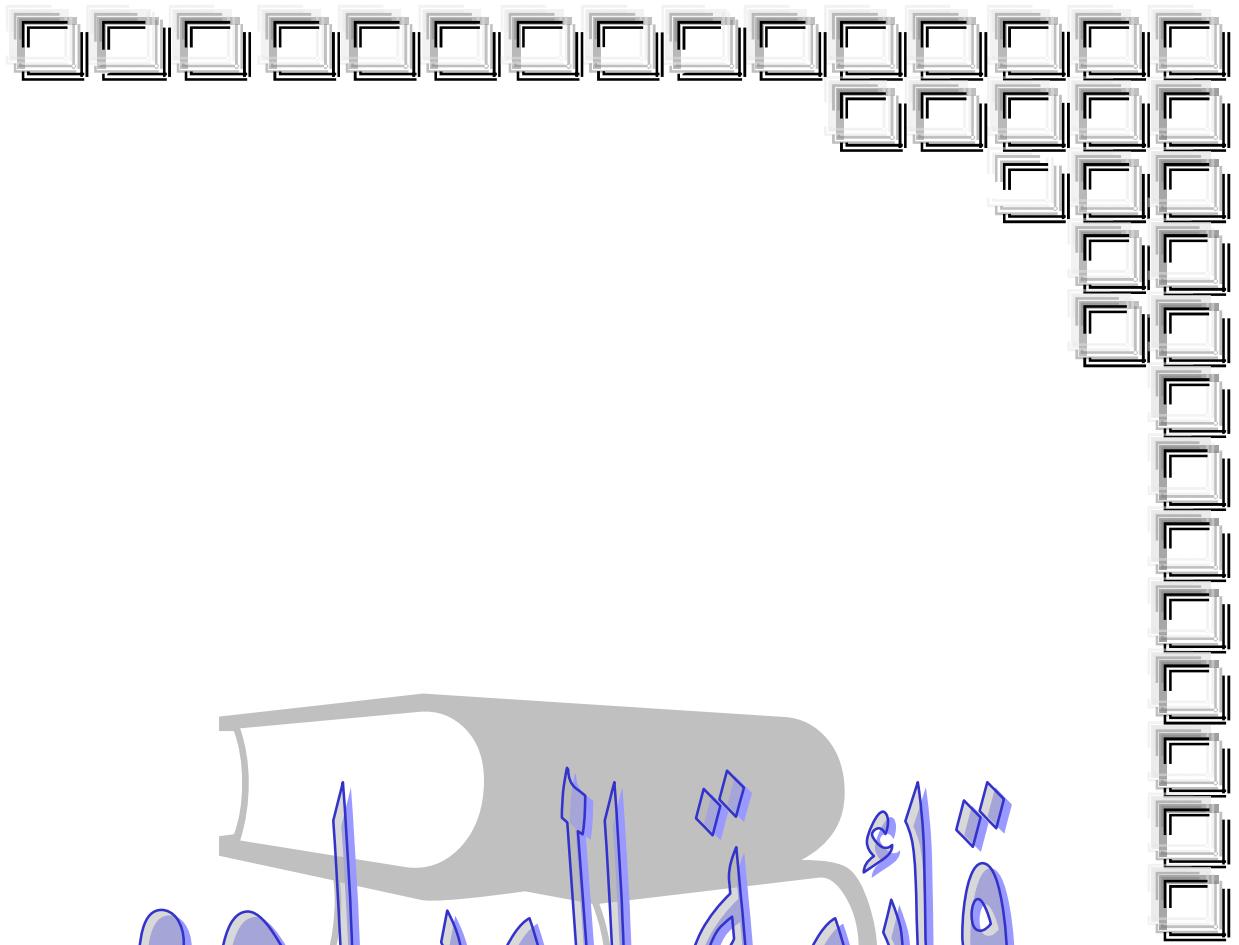

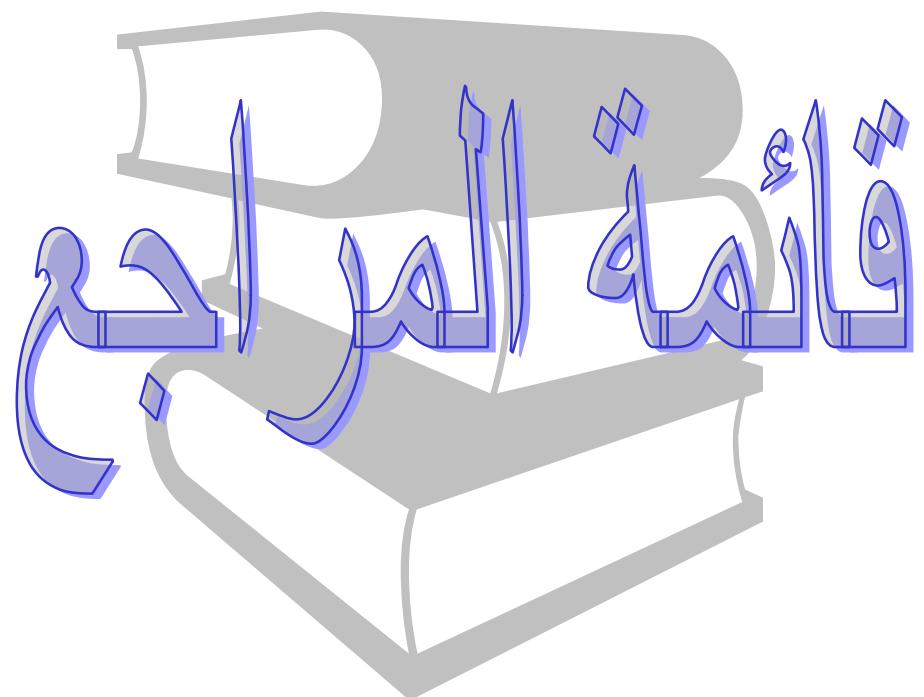

إطار النظري للغوار الصناعي

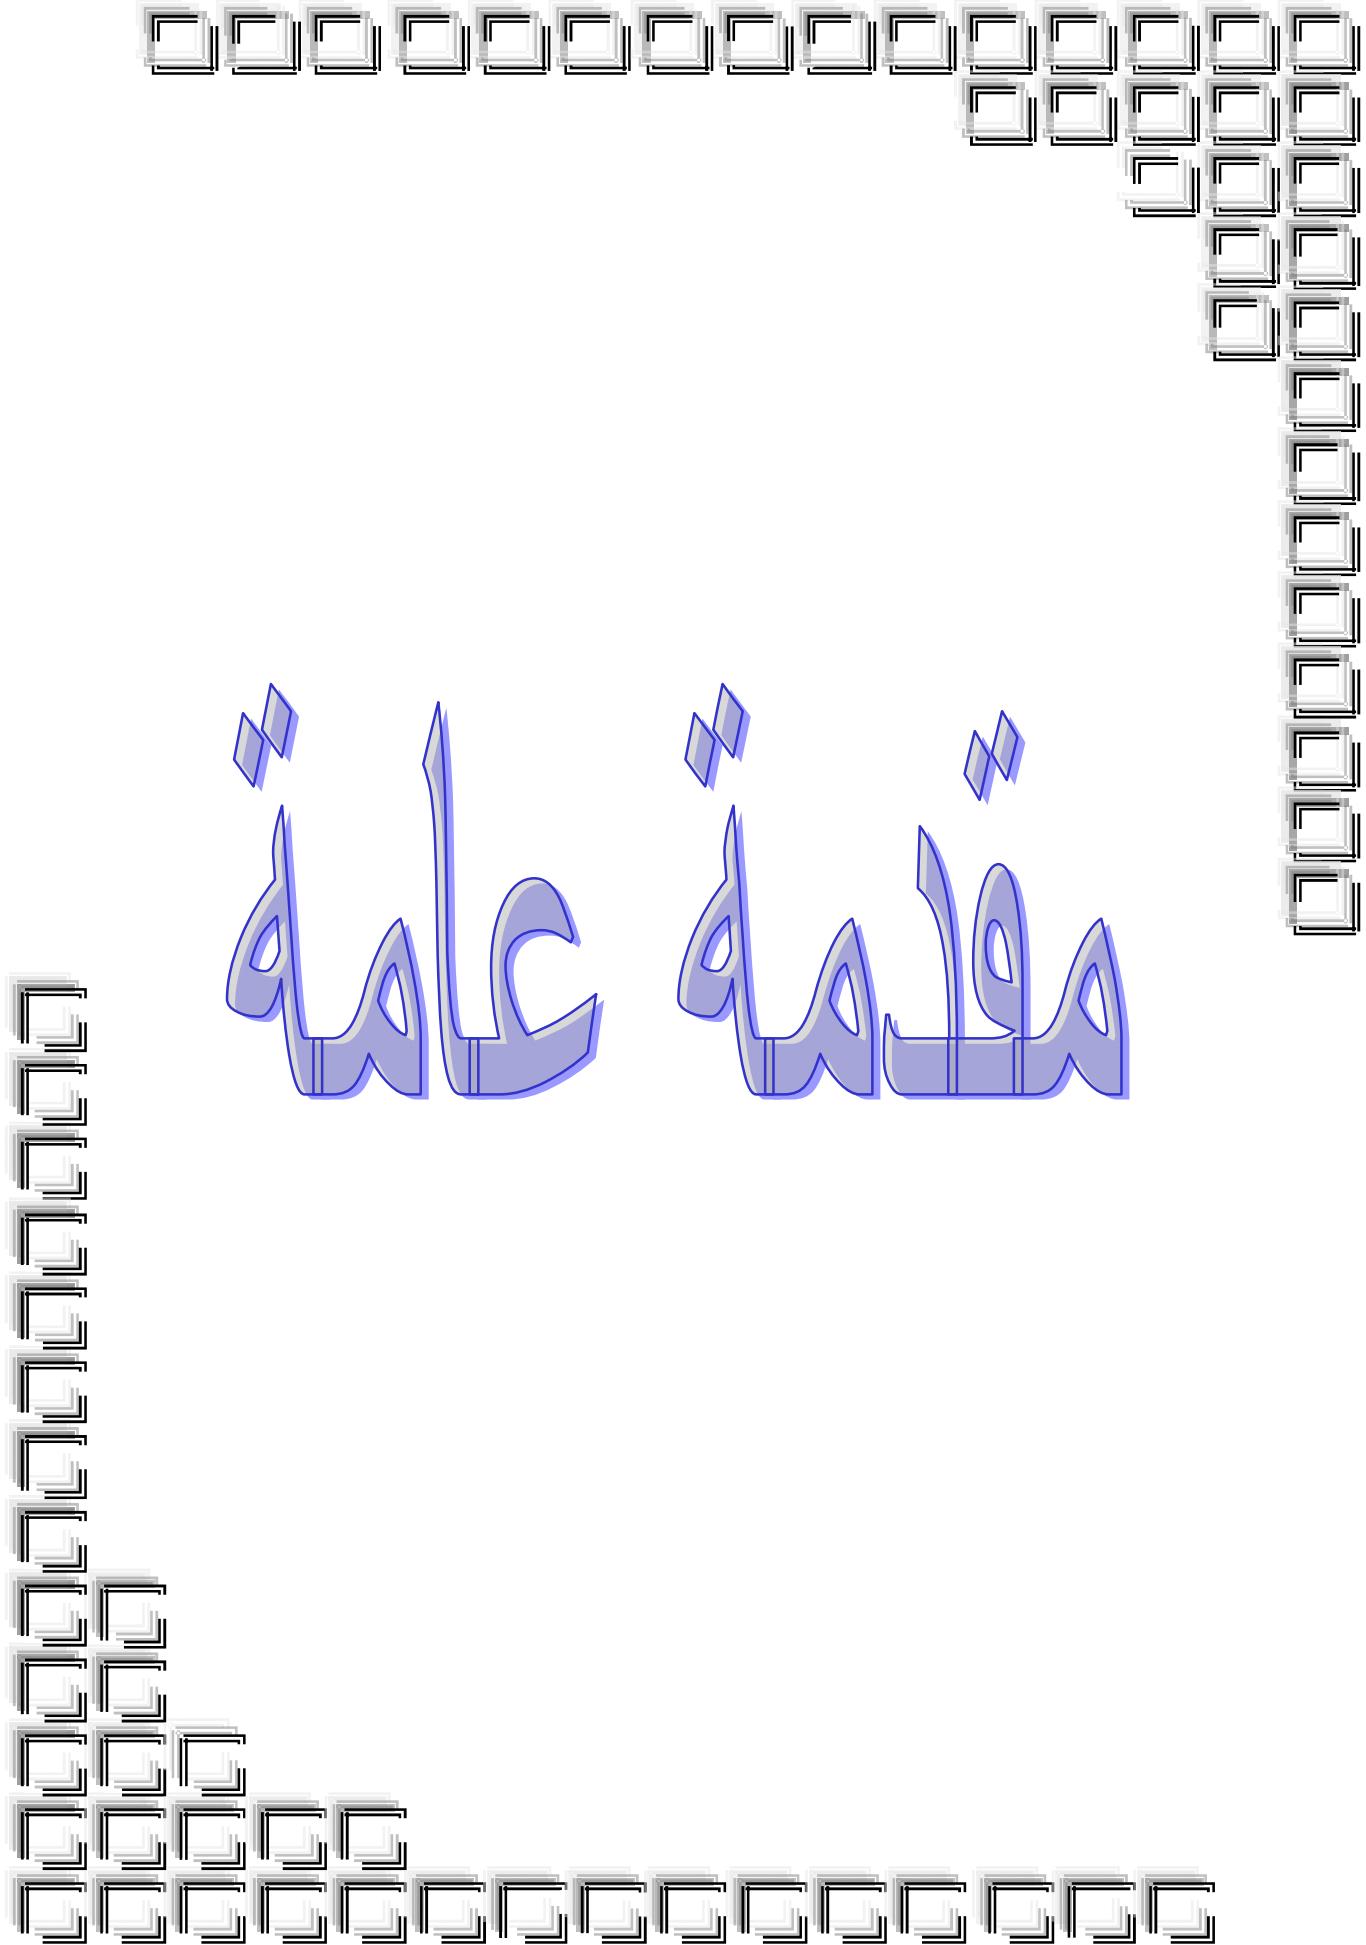

الفصل الثاني

المناطق المهمة والاستعمال

The diagram consists of two panels showing a cross-section of a plasma domain. The left panel shows a relatively simple configuration with two vertical flux tubes and a small island-like feature. The right panel shows a more complex configuration with multiple flux tubes, reconnection structures, and a larger island-like feature. Both panels use blue lines to represent magnetic field lines and shaded regions to indicate plasma density or temperature.
